BSc Mathematics - 2:1

Woodhouse College 2007 - 2009

Mathematics - A

Economics - A

Sociology - B

Profile

A mathematics graduate, I am inquisitive, analytical, and numerical by nature. I approach everyday problems in a logical, clear, calculated process. Earlier experience, as a team leader role in hospitality and teaching helped develop my communication and leadership skills. Initiative-taking, resilient, and fearless attitude, I resigned from a role in financial services to self-learn coding, as I needed a more stimulating and challenging role. I have 8 years of commercial experience and counting.

In my spare time I create websites and applications, DJing and creating mixes. I have also been known to enjoy a challenge; Hackney Half, London Olympic triathlon, and Tough Mudder.

Fvtvre

(.NET 8 microservice platform, B2B property management product)

- Frontend development for website, mobile application.
